

Coronavirus Precautionary Measures

First, a reminder:

Symptoms

Coronavirus symptoms include fever, cough, tightness of the chest and difficulty breathing. Members and employees suffering from these symptoms – especially a fever – must consult with a doctor and avoid coming to the Club until their diagnosis is clear. We ask for everyone's cooperation with this to protect Members, their families and our staff.

Preventative measures

The Club is monitoring government websites and David Brightling is in contact with his colleagues in Hong Kong and elsewhere on measures that are being put in place. This notice summarizes our Phase 1 measures, with further phases under development.

The best preventative measures we can take is to wash our hands frequently and thoroughly.

Hand sanitizing

The Club currently has hand sanitizing machines in the areas listed in **bold**, below, and will have them in other areas as soon as the dispensers arrive, hopefully early next week. Until then, alcohol spray bottles are available in each location:

- **Lobby**
- **ACC Market**
- **Hair Salon**
- Outdoor Playground
- Nursery/Playroom entrance
- Fitness reception desk
- **Fitness Center, second floor**
- Multi-Purpose Sport Complex (main floor, by squash courts)
- Functional Training Center (second floor, MPSC)
- Pool
- Pro Shop
- Gyoson
- Sigis
- Terrace
- Rendezvous
- Kitchens

Other sanitary measures

Housekeeping staff will be using alcohol to regularly sterilize door handles, railings and other high traffic surfaces.

Fitness staff will regularly sanitize handles on fitness equipment while class instructors will ensure that mats, etc. are sanitized before and after each class.

Toys and surfaces in the playroom will be sanitized twice daily.

Special measures for the Nursery and Playroom

In addition to the sanitary measures outlined above, we are instituting mandatory temperature checks and hand sanitizing for everyone entering the room.

Facemasks

The Club has ordered a supply of masks for those staff who choose to wear them now and is building up an inventory for a potential Phase 2 when we may require all staff to wear them.

Effective immediately, facemasks must be worn by all staff working in:

- The Nursery/Playroom – as outlined above
- Kitchens
- Housekeeping

Further notices

We will give weekly updates via our **e-newsletter** and your feedback is welcome via our **e-Comment system**.

Mike Brennand,
President
